TP-Link - Ændring af netværkskode/Wireless password

DKTV - 2018-06-01 - TP-Link

For at kunne ændre denne funktion forudsætter det, at du er logget ind i routeren.

[Vejledning kan findes her](#)

OBS. Det anbefales at disse ændringer foretages med tilslutning via kabel. Du kan miste forbindelsen til routeren, hvis du er tilsluttet via trådløs forbindelse.

Ændring af netværkskode/PSK password

1. Log ind i routeren - se ovenstående
2. Vælg "Wireless 2,4Ghz" eller "Wireless 5Ghz", afhængigt af hvilket netværk du ønsker at administrere
3. Vælg "Wireless Security"
4. I feltet "PSK Password" angiver du det ønskede netværkskodeord/Wireless Password
5. Tryk på "Save" for at gemme ændringerne.

The screenshot shows the TP-Link Archer C7 router's web interface. The top header is green with the TP-LINK logo on the left and 'AC1750 Wireless Dual Band Gigabit Router Model No. Archer C7' on the right. A left sidebar contains a menu with options: Status, Quick Setup, Network, Dual Band Selection, Wireless 2.4GHz, Wireless 5GHz (highlighted), Wireless Settings, WPS, Wireless Security (highlighted), Wireless MAC Filtering, Wireless Advanced, Wireless Statistics, Guest Network, DHCP, USB Settings, NAT, Forwarding, and Security. The main content area is titled 'Wireless Security' and has two radio button options: 'Disable Security' and 'WPA/WPA2 - Personal(Recommended)'. The 'WPA/WPA2 - Personal' option is selected. Under this option, there are fields for 'Version' (set to 'Automatic(Recommended)'), 'Encryption' (set to 'AES'), and 'PSK Password' (set to '37562618'). Below the password field is a note: '(You can enter ASCII characters between 8 and 63 or Hexadecimal characters between 1 and 32)'. There is also a 'Group Key Update Period' field set to '0' with the text 'Seconds (Keep it default if you are not sure, minimum is 30, 0 means no update)'. At the bottom, there is an option for 'WPA/WPA2 - Enterprise' with fields for 'Version' (set to 'Automatic'), 'Encryption' (set to 'Automatic'), and 'Radius Server IP' (empty).
